

Treasury Department 23^d March 1863

Sir

I find yesterday a warrant in favor of the Treasurer of the Mint for 1572 dollars & 20 cents for the purpose of covering the wastage on gold & silver for last year in conformity to your letter of the 17th inst. This I did according to the established usage of the Treasury, but without perfectly understanding on what description & by virtue of what law the account was made out in that manner.

As there is no person in this Department who can explain the subject to my satisfaction, I must request you to direct the goodness to do it whenever you please. I shall be glad to hear from you.

1st point on which I want information is - how is the wastage estimated at a fixed rate or proportion of the whole bullion, refined and coined, instead of being a real account of what has been actually lost by the wastage?

2^d Does not the 2^d Section of the act respecting the mint passed April 24th 1860, imply that the whole expense of refining including wastage, &c.

to be paid by the person making the deposit,
& not by the United States; instead of which
the Act accounts make a deduction of only
six cents per acre, which seems to be in conformity
to the 5th section of the Act of March 3^d 1797
to which last mentioned section, the 2^d section of the
Act of 21st April 1800, was, it is presumed, intended
as an amendment.

The subject is new to me, and I
may mistake the true object of the several
clauses of the law; perhaps, also, the law may
work some amendment. In any point of
view I will thank you for an explanation.

I have the honor to be,
with respect

August 4th 1862

I have this day directed the
Treasurer to remit to the Treasurer of
the Mint, two bills on the Bank of
the United States, one for four thousand
dollars, and one for one thousand
seven hundred and ninety two dollars
and ninety nine cents. The former
is for the advance requested in your
letter of the 20th Ult^o on account of
contingent expenses and repairs of the
Mint, and the latter for wastage &c
on gold and silver; agreeably to your
request, also of the 20th Ult^o.

This last sum is less than the
amount requested to be advanced by your
letter, and is for the precise balance of the
profit and loss account kept at the Mint,
as it stood on the 31st December last. By
a letter from the Comptroller of the Treasury
to the Treasurer of the Mint, dated April 5th.

1800, the amount arising from the sums
detained for refining &c; out of deposits of
bullion under the standard value, was
directed to be applied in the first instance
to making good the allowance for wastage,
and the remainder, only, was to be drawn
for out of the public Treasury. Those
savings, it appears, have never from the
commencement of the institution been ap-
plied in this, or any other way, and it
is in pursuance of the principle stated by
the Comptroller in the letter above referred
to, that I have now deducted them from
the sum requested as an advance, and
have directed the remittance to be made
for the balance only —

Sir

I am honored with your letter of the 10th Inst^l
and hasten to give you the best answer that I can, with regard to
the real & personal Estate of the Mint Establishment &c &c
This consists of

2 Lots on ~~English~~^{Septent} Street between Marchal &
Arch Streets, 20 feet each on ~~English~~^{Septent} Street, and extending
back about 100 feet, with a Dwelling House on the North
Lot & a Shell of a House on the South Lot, which East
Lot widens on the West to about 60 feet ^{where the stable stands} — These Lots
pay a ground Rent of 27 50/100 rate of Platinum —
a Lot on Sugar Alley, at the West of the above, 20 feet
front on the alley and about 100 feet deep —

A frame building improved for a large Furnace, in
the Common at the North End of South Street, of little
Value — the Ground being much loaded to us —

As to personal Estate, this consists wholly of

The Copper platelets on hand, amounting to about 22 Tons —

Three Horses, good for little but ^{for} the use of the Mint —

The Machinery of the Mint, of no Value but for the use of
the Mint —

Two striking Presses with machines —

Three cutting Presses —

one Milling Machine —

Two pair of Rollers great & small

one Drawing Machine

Three pair of ~~Small~~ Smiths Wellows

Two sets of Blacksmiths Tools —

A large number of ~~tools~~ ^{articles} on hand, of different denominations -
Carpenter's Tools -

Seven Hoes -

One Turning Lathe -

Two Scale Beams, Scales & weights

Two sets of Spring Scales - and sundry adjusting scales.

Furniture in the Clerk's Room -

~~Household~~ ^{Household} articles used in the several departments

about 2000 Bushels of Bluecoal -

Engines Tools - Pots - Dishes &c &c an old Horse Cartage.
about 2000 fire brick - a considerable quantity of old ~~iron~~ ^{iron}

It is impossible to ascertain the Value of these Articles, as most of
them are of but little ^{consequence} ~~value~~ except for the use of the Mint or
to Persons who may intend to put them to the like uses - and if
sold at public sale, ~~will~~ ^{will not} probably bring ~~at~~ half their real Value -

~~the~~ ^{the} ~~of~~ ^{of} the Mint, may last a year longer with some re-
pairs, but after that, will cost about 250 Dollars to put them in
good repair - The Horses may also last another Year, but must
then ^{as fast as} be replaced by others -

~~If it should be thought best to continue the Mint, the Establishment should~~

If it should be thought best to continue the Mint, the Establishment should
be rendered permanent, and the Machinery should be moved by Steam
instead of Horses which would ^{in some measure} ~~reduce~~ ^{reduce} the annual Expence of Labor
as almost the whole of it could be carried on with ^{the} same original force

Our Lots are much too small, by which we are greatly cramped as to
Room - They are now very valuable, being in the heart of the City -
Their Price would purchase a very advantageous Lot, in a safe public
Place, and buildings might be now planned, so as to reduce the
Expence of the Mint ~~by~~ But I am perfectly satisfied that no
modification of the Mint, could be contrived to lessen them below 17
or 18000 Dollars ^{at least}, tho' of a larger quantity of Bullion coined

by any means be provided, a greater quantity of coin could be ~~made~~
annually made with the same expense in ~~the absolute~~ ^{the absolute} ~~as all~~
I am ~~convinced~~ ^{individually, of opinion} that its present expense of about 500,000 Dollars ~~annually~~
in addition to the current coin of the union, is sufficient for the ~~present~~
welfare of the united States. — It is the absolute necessity of
strict economy, throughout the whole Establishment, that makes the ex-
pense of the Mint so great, and this cannot be dispensed with, under
any ~~moderation~~ ^{moderation} that can be proposed. ~~I am~~ ^{I am} ~~convinced~~
in no given circumstance, can the necessary coin of the united States be
produced with safety to the Government, at a much less expense than
it is at present, and I believe that in the consideration of the subject,
it would not be safe, to estimate the expense at any rate, much under
200,000 Dollars. — In the ~~above~~ ^{above}

In the above estimate of expense, it should be remembered that
the Copper Coins ^{may} produce a profit of ~~5000~~ 5000 Dollars ~~annually~~ ^{in future}, that ought
to be credited against the expediture of the Mint, which reduces the amount
considerably.

Sir, I have to acknowledge the receipt of your letter of the 27th Ultimo, and have directed the remittance of 3386 Dollars, requested in your letter of the 17th Ult^o, to be made for the purchase of Copper.

I am requested to enquire in what the real and personal property of the United States pertaining to the Mint establishment does consist. Will you be good enough to give me the information and to mention at same time the present state of the Machinery, and the probable expense of procuring such as might be calculated to carry on the establishment in the cheapest and most efficient manner. What Congress will ultimately do I cannot at present ascertain, but I am desirous that they should be possessed of all the facts, and be

Sir

I had the honor to receive your letter of the 11th inst. covering receipt from the Teller of the Bank of the United States for 3,386 Dollars in coin. Although the House has not yet given a regular credit for the same, I would think myself authorized to consider the payment as made in the Treasury & sufficient to justify a warrant in your favor for the purchase of copper. But as the House of Representatives have approved a resolution for abolishing the mint, it does not appear to me prudent, until a decision shall have taken place on that subject, to proceed in purchases which may eventually become useless, unless there are favorable

reasons to justify it.

Under that impression
I have to request that you will inform
me with precision of the nature of your
contracts & engagements in that respect, also
of the quantity of copper either on hand or
purchased. If the amount of costs being
paid in Bank & for which you request
a Warrant, be wanted for the purpose
of discharging ~~a~~ debt or fulfilling an
engagement previously contracted, the Warrant
shall be transmitted without delay
but if it be wanted only in order
to enable you to enter into new engagements,
I wish to be informed of the inconvenience
which will arise from a delay.

There is another circumstance
with which I would also ^{wish} to be informed.
What additional price would you be obliged

to give in England for freight costs, in lieu
of the share you now receive? and would
such an agreement diminish the security
you now have of receiving good copper? My
object is asking for the best information in
to ascertain the best mode of obtaining a
copper exchange (which I consider an essentially
necessary) if the trust establishment is to
be discontinued.

I have the honor
to be very respectfully
Yours obedient Servant

Sir,

Your letter of the 29th ultimo, has been received, and I have directed the sum of four thousand seven hundred & thirty eight dollars and thirty cents, to be remitted to Doctor Benjamin Rush, Treas^r of the Mint, being the precise amount of the deposited by him, in the Bank of the United States.

I regret exceedingly, the difficulties to which you have been hitherto subjected in obtaining money from this Department, on account of checks deposited in the Bank to the credit of the Treasury, and with a view of guarding against similar occurrences in future, I would beg leave to recommend, that the original receipts of the Cashier or Teller, for each deposit, be transmitted to my office.

Your statement of the transaction in regard to the copper clippings sold by the late Purveyor, is perfectly correct, but, in the present state of that business, I do not see how a warrant can issue in favor of the Treasurer of the Mint.

Mem of 4th. 25 June 1802

The much account of obliging you with the little expenditure
of my Department, yet I am obliged to it on this occasion - When I ac-
cepted the Directorship of the Mint, I found the annual Expenses much too
large, for the services done - On a full examination into the business
I reduced them very considerably, and particularly with regard to the Copper
Coinage - The copper was purchased in large sheets by one Minister or another
or by Merchants in this Country - It was so high, that by means of the Power
of the Blippings, the ^{Copper} could be got at least 9. p lb more than the
value of the Coins made from them - I voluntarily (the not made my duty)
with President Washington's approbation undertook the troublesome business
of importing the Copper myself - I imported in small planchets cut out
of the sheet Copper, instead of being in large sheets, but the Copper was the
same, in an unwrought state - ^{only we saved the loss of blippings and payment of them} - This measure ~~increased~~ the benefit yielded
a profit of 9. p lb instead of 20 on the lb - But the Collector of
the Customs did not approve of this system and paying duties, and therefore
demanded them of me - I refused to pay them, it being but sheet copper then
in smelted form - This would have been ruinous to the whole plan - On
referring the dispute to the Treasury, the Collector was directed not to charge any
duties on the Copper, and I have ever since imported it duty free - I have
lately recd. an Invoice of about 7 tons, which the Collector now again demands
the duties for - and on my refusing to pay them, ^{money} he will not admit their duty,
and they remain on board ship, in great danger of being seized by the duty-walker
It seems as if every opposition was made to lessening the Expenses of this Establishment
If the duties must be paid, I must now resort to the old practice, of purchasing

the proper time, as I cannot outgrow the difficulties attending the
organization and attendance at a large House when so many difficulties are
raised to every business - My salary little more than pay
my House rent & for food, and to keep me so much more than is required
of me by law, would be very improper if I am benefiting the public
I - the copper trading will bear the expense, & be worth continuing -
I submit the matter to the Congress of the United States & shall hope to
be sustained by his motivations in Congress -

in his note of the 10th instant.

Decr 24. 1802

The Treasurer of the mint is happy in being able to inform the Director of the mint, that the supposed delay in carrying the 3000 Dollars mentioned in his note, to the credit of the United States, between January 1798 & Jan^y 1799, arose from a mistake in Mr Thomas ^{the} in ~~date~~ of the receipt given to Mr Ekfeldt. It should have been dated in 1799 as appears in Mr Ekfeldt bank book. The money was carried immediately to the bank, but in conformity to the rules prescribed by the Treasury, the entries in the books of the mint were not made till the close of the quarter.

Sir,

Your account as Treasurer of the Mint, for the ordinary receipts and expenditures thereof, commencing on the 1st of July and ending on the 30th of September 1801, has been adjusted at the Treasury, and a balance of ten thousand six hundred and sixty six dollars and sixteen cents stated to be due from you to the United States, for which you will be debited in a future settlement.

This balance is five thousand five hundred and eighty two dollars and twenty cents more than that stated in the account rendered and consists of D. Stewart and Son's protested bill of Exchange for that sum.

The following vouchers to the account now adjusted being deficient you are requested to forward them to this Office, in order to be filed therewith — that is to say —

1. The original bills of the Cost and charges of the Copper Planchettes.
2. The bill of lading or any agreement that may have been made with Baker and Conegys on account of the freight thereof.
3. The receipt for the payment said to have been made by Lodewyck Sharpe, for portage of the same.

Resolved, That the Committee of
revisal and unfinished business be
instructed to inquire and report to this
House the probable amount for which the
houses and lots at present occupied by
the mint in the City of Philadelphia,
together with the personal property of that
establishment, could be sold, and also
the probable expense of procuring more
suitable ground erecting the necessary
buildings and constructing the machinery
requisite for the establishment on the
principle of having it worked by steam.

Sir

Having just imported about thirty tons of
copper for the use of the Mint, I am informed by my correspondent
that copper will hereafter be raised from \$116. per ton to \$140 per ton.
There is also a duty of 4 p.c. charged on it, and bills
with an indorse cannot be had under 175 p.c. — All this will
make the cents issued from the Mint, as high as their gold value,
if not higher — The quantity of cents already issued, seems to have
been sufficient for the use of the United States by so many remaining
on hand — The addition of thirty tons will greatly ~~increase~~ ^{exceed} the quantity immediately necessary, It is therefore with
respectful consideration in the President's judgment, I submit to him
the question of propriety, of forbearing to import order another im-
portation of copper for the next spring, till we see what the next
year will bring about as to the price of copper & exchange —

It will be necessary to determine on our line of conduct before the
fall ships sail —

Sir

Before the rec^d of your letter
of the 16th September current, I had inform-
ed the assistant officers of the Court that
on information that you or the Treasurer
was there, I would take the opportunity
of a conference with you for the purpose
of an arrangement upon the subject of
the cents. I have been twice there
upon the subject without the pleasure
of seeing you, which I mention merely
to show that I have not been inattention
to the adoption of prompt measures.

My difficulty arose from information
that it had not been the practice of
the Bank of the North to give any evidence
of the deposit of the cents there; and I
wished to ask your aid, as a director
of

the Bank, to procure some evidence, which
might justify the Treasurer of the U.S. and
myself as his agent. In application
yesterday, I find that the Cadmus is
willing to give a note of the deposits
of cents, and I have therefore orally
requested the principal Clerks in the
Mint to have all which are on hand
sent on this day. The process will hereafter
proceed with the utmost safety to the Treasury
of the U.S. (and of the Mint) and has his
satisfaction. I shall accordingly be in with
the train on which it proceeds.

Registrar's Office, Sept. 23. 1803

Sir

The Secretary of the Treasury having intimated that he wishes to be prepared to lay before Congress the annual Estimates for an Appropriation of monies by Law, for the service of the ensuing year, I beg leave to request that an Estimate of monies required for the use of the Mint, may be furnished as early as convenient -

I have the honor to be

Sir your most obed.
and most humble Serv.

Amos K. Ruggles Registrar

Elias Boudinot Esq.
Director of the Mint of U. States

Mint of the U.S. 16 Sept 1863

D. S.

I beg leave thro' you, to inform the President of the United States, that a dangerous Malignant fever has again appeared in this City, which will oblige me to shut up the Mint, for a short time — I perhaps might have continued it open some little time longer, but having worked up all the Bullion of every species of specie the Coin, I have no hopes in the present state of the City of any one ~~deposit~~ making ^{of Coin} deposit, till the Alarm is over — We should ~~therefore~~ be idle, and therefore on a plan of Economy, I have consented to this Measure, as a few hundred Dollars will be saved to the United States, and no life sustained — As it will take some days to make the necessary Arrangements, if the President should disapprove the Measure, a line signifying his ~~disapproval~~ ^{disapproval}, will be punctually attended to —

I have the honor to be with great respect

Yours very truly

H. Amable James Madison Esq, Secretary of State —

United States
16th Sept. 1800.

Sir

There are 18 Baskets of Goods amounting
to Dollars ready to be paid to you or your order
in the Mint of the United States — The Law makes it my
Duty to pay them to the Treasurer of the United States im-
mediately on coming & I have therefore signed a warrant
for that Purpose, and beg you will see for them without
delay, as I am about shutting up the Mint on acc^t of
the malignant fever in the City, and I must consider
them hereafter at the request of the Treasurer of the U.S.

If you have no place to put them, you may have the
use of one of the Vaults in the Mint, provided you place them
there yourself & take the charge of them —

Mint of the United States
Philad^a 14th Sept 1792.

The appearance of a malignant Fever in the City, again threatens the dispersion of the Citizens, and the probable shutting up of the Mint. — This must take place whenever the Officers of the Mint shall officially certify to the Director, that it is dangerous to the Officers and Workmen to continue the usual work of the Mint. — It will therefore be necessary for the Officers to be prepared for so disagreeable an event, that no confusion may take place in case of the necessity of suddenly closing the business.

The following directions must be particularly attended to.

- 1st All the accounts of Bullion and Expence, must be closed till the Day of shutting the Mint, so that the Ballance due by or from the Mint may be clearly ascertained.
- 2^d The Workmen must be all paid off on that day.
- 3^d If any of the Officers should want any advances on account of their Salaries, it may be done, provided they do not exceed the portion of the Quarter due to them. — Partial receipts may be taken by the Treasurer on Account.
- 4th All the gold and Silver Bullion in the Mint must be coined as far as possible, and every deposit paid off, if the Coin will admit of it, before the closing of the Mint.
- 5th Whatever shall remain of gold- or silver Coin, Bullion, Clippings or Grains, must be taken care of by the Treasurer, and will take such measures for its security as he may think expedient.
- 6th The Officers of the different Departments will take measures to secure all the Works in every part of the Mint, together with the Tools, Implements and Machinery belonging to their respective departments, so that they may not be injured or even visited by any person whatever during their absence without leave. — The Chief Coiner will

also

also that all the Papers are secured and the Mechanism put away in a separate place.

7th The Chief Coiner, with the Engraver will particularly attend to the positive Destruction of all the spoiled Dies, so that no possible use may be made of them for Coinage in case they should be stolen, not so much as for a Pattern.

8th All the good Dies must be boxed up and sent to the Bank of the United States, an official List being first taken of them and left with the Directors Clerk.

9th If practicable with safety, the Chief Coiner or his Clerk will now and then visit the Mint, to see that all remains as left.

10th Mr. Sharpe will draw up a short Article in writing for such Workmen as choose to sign, purporting that they engage ^{themselves} to their different employments, when the Mint shall again be opened, in consideration whereof they shall respectively receive ^{half of their} original pay, extraordinary, in four weeks after their return, let the Mint be shut up longer or shorter. All who refuse to sign will be of course discharged.

11th The Horses will be put out to pasture under the care of Mr. Eckfeldt.

12th All the Books and Files of Papers must be carefully looked up in a box or chest, and carried to the Bank of the United States, being first sealed with the Seal of the Mint.

13th The different Keys of the Mint had best be also lodged in the Bank in a box carefully sealed and sealed.

14th The Doorkeeper, in case he will stay, will be careful to suffer no visitors of any description to enter the Mint during the absence of the Officers, without very urgent necessity. He will also carefully patrol the Works every half hour during the night.

15th The above directions are not to interfere with the respective Officers absolutely discharging every workman they can do without in case of the Mint again opening.

16. If the Door Keeper should be obliged to leave the Mint, the ~~old~~ watchman must be engaged to attend to the Mint as formerly, for which he shall receive the same sum he received in 1798.

Thos. Bordenist Director

The Officer of the Mint having signed the Certificate mentioned in the beginning of the above order, let the Mint be shut up ^{whereas} the Men discharged for the present, be called for again. It is presumed that the above directions have been strictly complied with. — Sept. 26th 1803.

Thos. Bordenist D^r

To the Officer of the Mint —

Mint of U.S. Dec 1864

The Director having seen with distress, the careless manner in which strangers are admitted into the Mint, notwithstanding his repeated orders to the contrary, delivered in person to the Officers, he now positively orders the Chief Coiner & Melter & Refiner, to see that in future, none of the Hands be allowed to introduce any stranger in the Mint - and the Door Keeper is expressly ordered not to admit any Person to come into the working rooms, without an Officer attending him - When any Person comes to speak with any person in the Mint, let him be taken into the Director's room, where he may see the person he wants - The Director thinks this measure so essential to the safety of the Mint, that he will seriously take notice of any person breaking the orders -

When I came to the Directorate of the
franchise, embracing a very large
mint, I found a large furnace built at the Throat of the Town, and
with the consent of the Agent without cost
Left of Mr. Cairns, which I was informed was absolutely necessary for
conducting the business of the mint. I found it an expensive establish-
ment but submitted to it as a case of necessity. On a further examina-
tion with the courage, ~~and on making some new arrangements~~ ^{Department, and on making some new arrangements} it was wholly unnecessary
and have ~~now~~ for some years, made use of it merely as a store house
for coal &c. It is now in want of repairs, which cannot be done without ~~cost~~
It has become rather old & ruinous, and must be re-
paired at some ^{considerable} expense, if we intend to preserve what is stored in
it. Mr. Cairns's Agents call for the date, ~~or that we pay for it~~
and in we are now called upon to improve it, is contrary to a warranty.
The use of it is not worth the expense, ~~therefore~~ ^{therefore} submitted it for
rent for the mint. I submit it therefore to
the consideration of the President, ^{to him} that the iron (of which there is a
considerable quantity round the body of chimney of the furnace) should
be taken down, and the ruins of the House sold ^{at public auction} for the benefit of the
mint. ^{His} ^{perhaps} will ~~cost~~ bring 2 or 300 Dollars, which will be so much
saved to the United States.

Sir

I beg leave to request that the usual Estimates for the year 1805 may be prepared and transmitted to the Treasury Department, as early as convenient, for the purpose of being laid, by the Secretary of the Treasury, before the Legislature of the United States at their ensuing session -

I am with the greatest Respect,

Sw

Yours most Obedt.
and most humble Servt.

My Name Register

Elias Boudinot Esq.
Director of the Mint

Sir,

Treasury Department
Comptroller's Office
October 11, 1807.

Your account as Treasurer of the Mint, for the ordinary Receipts and Expenditures thereof, commencing on the 1st of April and ending on the 30 of June 1807, has been audited at the Treasury, and a balance of Eight thousand, two hundred and thirty seven dollars and sixty three cents stated to be due from you to the United States, for which you will be debited in a future settlement.

This balance is five thousand, five hundred and eighty two dollars and twenty cents more than that stated in the account rendered, and arises from the suspension of a protested Bill of Exchange, amounting to that sum, purchased of D. Stewart & Co.

I am, Sir,
Respectfully,
Your Obedt Servt.

If you will be so good as to send to this
office the letters of application for assets, or
contracts ~~of the~~ letters as ~~contracts~~
that business they will receive that attention, which
every one has ~~desires~~ ~~desires~~.

They must either be accompanied by a
payment of the money, or they must be
made known to the Treasurer of the U.S., as
I have instructed.

I suppose that the Branch Bank of New
York must have plenty of capital even as
of 1852. I mention on June, they are doing very
well. I presume you have not an application
from them, for that reason to be aware when
they want even they apply to the Cash. B. U.S.
here. But the contracts or letters will enable
me to attend to the business.

Your New York friends could have
the assets at the Branch Bank N. Y., I believe.
My letter to you of Sept. 4. will show your
inability to attend to these matters, and
hope of the Branch Bk. U.S.

All charges of shipping water to the nearest
place of entry are paid by the U.S. At this

will soon close, I feel thank you for
the letter on subjects to day.

I am,
Yrs. respectfully,

Enclosure, Mr. Phil
to Mr. W. H. R.

It is unusual that no public consideration
attach to the Treasurer or his office because on
the 11th of June every cent and half-cent made
was sold, and delivered to the public for the first time.
I shall be glad to receive a note of the amount
sent now on hand. Spent by my letter to the
Treasurer that I intended to send on the 16th July.
That all the copper coins in the Mint & Bank
be distributed except one sack then
taking at the Mint.

Dear Sir,

It is with great pleasure, that I shall on every occasion, give you all the aid in my power.

The act of Congress, you refer to, has been always attended to in the appointment of Clerks, but in the case of Workmen, who are going & coming continually, the late President, referred it wholly to me, as it was impossible they could judge of the merits of professional applicants, and desired me to consider their approbation as given.

The salaries of the Clerks are fixed by Law; but in my predecessor Mr. Pitkin's time, finding that he could not get a book-keeper for 500 Dollars, he allowed one 700, and then represented the matter to Congress who gave the 200 Dollars in addition.

When I took charge of the Mint, I found the same difficulty and applied to a Committee of Congress, and represented the necessity of the increase of the Book Keeper's Salary, which I accordingly charged in the Estimate, which Congress has ever since regularly allowed.

In like manner the Salary of Mr. Desfeldt has been raised to 800 Dollars finding that I could not keep him at 700 Doll. I stated the difficulty to the President & a Committee of Congress, and it has been included in the support Bill ever since.

The Salaries of the ~~other~~ Clerks & Workmen

when I first established them, were laid before the President and approved
of by him ~

I have the honor to be with great respect

Baltimore September 16th 1861

Mr. Steward's bill was put in suit shortly
after it was transmitted and that house
becoming bankrupt two questions arose
in the progress of the suit one whether
the bill was the property of the United
States in the manner in which it had
been originally the other whether sup-
plying it to the Government was a debt due to the
Government and it was in fact a preference
of payment.

These questions have both been decided
in favor of the United States and the
trustee will pay the full amount of
the claim as soon as they have funds
what was reported to be in hand in
November. I shall not fail to inform
you of this circumstance as soon as it
occurs. I am very respectfully.

Yours faithfully

Sir,

For the better security of the property belonging to the
mint, you will please to have made and hung at
the entrance of the small court into Sugar alley, a
substantial gate, always to be kept shut, unless when
any business relative to the mint shall require it to
be opened - & let the expense be charged to the acct.
of contingent expenses.

Sir: Foreign Gold Coins having ceased in May last to be a legal tender, the propriety of converting at the Mint the Spanish and French Gold into coin of the United States, was suggested to the Bank of the United States. The copy of their answer is herein enclosed, and as the subject is of some importance, I beg leave to request that you will inform me whether Mr Richardson's assays may be depended upon, and how it happens that they differ so much, as relates to Spanish Gold, from those understood to have been formerly made, and on which the legal value of that species of gold was established. It is not improbable that Congress may under the existing state of circulating medium and commerce, renew the law by which foreign gold had been made a legal tender; and in that case a question will arise whether Spanish should continue to be rated as heretofore, or should be reduced to its true value as ascertained by Mr Richardson's assays. On that subject permit me to request the favor of your opinion, together with such other observations connected with

it, as you may think of importance.

I have the honor to be,
respectfully,

Sir,

Your obed^t. servant

Robert Patterson Esq^r

Director of the Mint

Philadelphia.

"With regard to the first subject, your Committee found their opinion ~~in~~ experiments of Mr. Richardson, the Assayer of the Mint of the United States. It is stated by him that, by repeated assays made at the mint, it is ascertained that the milled Spanish Doubloons are no more than twenty one carrats fine.

The Bank receives 1000 dwts milled Spanish doubloons for

\$875.91

1000 dwts Spanish gold, 21 carats fine, contain

554 dwts 13 grs standard gold, at 27 grs to the dollar \$848.48

\$ 27.43

So that the Banks are in the practice of receiving 1000 dwts in Spanish milled doubloons at \$27 $\frac{43}{100}$ more than their intrinsic value, and in case of a recoinage, must bear the expence of refining.

The assays upon French gold have not been so frequent and are therefore not so much to be relied on for their accuracy. The following is the statement of an assay upon two french guineas.

Not dated	1746	(Lewis the 15 th)	gross wt	5.5 $\frac{1}{2}$	quality	21.3 $\frac{3}{4}$
" 2	1786	(Lewis the 16 th)	"	4.22	"	21.2 $\frac{3}{4}$

1000 dwts of gold 21.3 $\frac{3}{4}$ fine Contains 997 dwts 3 gr
Standard of United States - value \$ 886.33

1000 dwts of gold 21.2 $\frac{3}{4}$ fine Contains 985 dwts 18 gr
Standard of United States - value \$ 876.22

1000 dwts of french coins are taken at Bank for \$ 875.91

From the above experiments and observations it appears
that Spanish gold coins could not be received at the Mint
of the United States without a loss of about three and
one eighth per cent; exclusive of the expence of refining;
and including that expence the loss would amount to
about three and a half per cent: - but that french
gold might be received without loss, except the expence
of refining. It results therefore that it may be expe-
-dient to receive french but not Spanish Gold? -

which he remained accountable on the last settlement, and also the deposits of bullion, value of coins paid, allowance for wastage, and balance of the United States.

Sir,

I have received your letter of the 3^d. Half Dollars suits as well as smaller coin. My object is to get a silver coin which will not be shipped to India, that we may use it instead of Bank Notes of 1, 2, 3 & 4 Dollars, with which the country is flooded, by the Banks in this city, and those in the country.

Mr. Simpson informs me that he cannot accommodate Mr. de Roy with the sum which remains unpaid, he therefore wishes to let the whole remain at the Mint until it is finished, otherwise he will be obliged to find twice for it.

I did not expect to receive the money mentioned by Mr. Gallatin from you - the order will come from him. I made enquiry with the view of reminding him of it as soon as there was a probability of its being ready.

I am, very respectfully,

I wish to be able to distribute in October & November

are several orders for cents, unexecuted for want

or never yet supplied. At this season orders are
to be expected. I take the liberty to communicate
this state of things, that you may be able to give
such directions as circumstances may appear to
require; and the situation of the mint admits.

Sir,
Your letter, informing that 10749,63 Dollars
in small coins was ready, was duly received.

Some time ago Messrs. Jacob L. Roy & Son recd. from this
Office 20,000 Spanish Dollars, and from the Bank of New York
30,000, on an agreement to deliver in New York a like sum
in American coins they wish to bring on the whole at
once, and have been waiting for the completion of it, but
as it is desirable to bring it while the weather and roads
are good, I have this day written to Mr. Simpson to
request him to supply whatever sum may be unfinished,
and take our order on you for it. If he agrees to do
it, Mr. de Roy will send immediately for the money.

I have no objections to have the residue coined into
half Dollars, which will be less labor than quarters.

The directors of the Treasury informed me, when he
was in New York, that he should place a considerable
sum in the Mint to be coined, and that he would
give me an order for 50,000 of it, if we would bring
it

it here at the expense of the Bank. This was
agreed to. I will thank you to inform me whether
any progress has been made in this business, and
when it is likely to be effected. We are not in
want of the money, but if it should be ready, I
should like to bring it before the Winter sets in.

kind letter of the 2nd inst. with its enclosures on
my desk in the office. —

I am very glad that you have discovered
the difference between the statement accompany-
ing your letter to the President on the subject of
the appropriations of the Ark and the one made

difference are of a nature as not deserving

not even to notice it in your next annual

it is of no importance.

Mr. Robert Patterson

Dear Sir,

It having always been a part of my duty in the Treasury Dept. to make out the annual statements of the operations of the Mint, for the Comptroller to be laid before Congress each Sept., and having prepared them for the year 1805. and from the commencement of the institution to the 31st Dec. last year, I was ready for making my report when accidentally Samuel R. Smith's paper, the National Intelligencer, came into my hands wherein was a copy of your letter of the 3rd Inst. sent to the President of the United States on this same subject. - At first view of this letter I was much pleased at having an opportunity of checking my statements by your reports.

In the printed copy the amount of Gold coined from the commencement of the Institution to the 31st Dec. 1805 is \$2,613,972.50 - that of Silver \$1,938,917.75 and of Copper coins \$179,458.47 making a total amt. of \$4,732,348.72. - ~~but~~ ~~the~~ ~~total~~ ~~now~~ ~~any~~ ~~of~~ ~~the~~ ~~other~~ ~~amounts~~ ~~agreed~~ ~~with~~ ~~my~~ ~~statements~~, I readily concluded that mine were erroneous, and began to re-examine all my former statements. The result of which proved to be the same as others had it. V^z amt. of Gold \$2,547,557.70; Silver 1,910,402.75 and copper coins \$177,903.47 charged as paid over to the Treasurer of the United States and \$1070. - remaining in the hands of the Treasurer of the Mint - making in all \$4,635,863.92, which is \$110,415.05 less than stated in the letter. -

My next examination was the printed reports furnished annually from the Mint, which I find correspond with my statements except the amt. of Gold for the year 1802 which is \$4000 too much. -

I then began to doubt the correctness of the News paper statement & found that the amount of the Gold, Silver & Copper as there stated, was \$4,15,000 - that of what the total was stated to be - from which I have concluded & do hope that the differences are entirely owing to the carelessness of the printer and not an error of yours or your clerks -

With a desire to give you every information in my power on the subject of this difference, I have now to give you a copy of all the (annual

them in the Printed Reports to Congress, from the commencement of the
Institution to the 31. Dec. 1804. And of the quantity accounts furnished
for the year 1805. →

Sir

It having been enacted by the Act regulating the
currency of foreign coins in the United States, passed April 10th 1806,
that it should be the duty of the Secretary of the Treasury to cause
assays of the foreign gold and silver coins made current by the said
Act to be had at the Mint of the United States at least once every
year; I have to request that you will cause assays to be made both
of the foreign coins above described issued previous to the Act afore-
said, and of the said coins issued subsequent to the said Act, in
conformity with the provision of the same, and to report the result to
me, together with your opinion of the alterations which may become
 requisite from the real standard value of such foreign coins.

You will be pleased to state a distinct account
of the expenses which shall have been incurred in the operations.

Sir,

Your account of copper coins received and paid from the 1 April to the 30 June 1867 has been adjusted at the Treasury; and thereupon a balance of five thousand and fifty two dollars and twenty one cents was stated to be due from you to the United States, with which you will be charged in a future settlement.

In reply to that part of your letter of the 16 July which relates to the difference in the balances as stated by you, and those found due at the Treasury in your accounts of Copper Coinage, I have now to observe, by way of explanation, that those differences arise from the circumstance of your charging the United States with the amount of Cents and half Cents as they are paid over to the Treasury's Agent; whereas you do not receive a credit for the same until the money is in the Treasury — that is, to the credit of the Treasurer in some of the Banks. This may not, sometimes take place for weeks after the agent has received the money from you. Ultimately, however, that is, on the final settlement

of these transactions the accounts will close, and
no difference in the statements exist

Memorandum Robert Patterson, Director of the mint of the U. States, has, with the approbation of the President of the U. States, employed John Riick, as an assistant engraver in the said mint, at the salary of six hundred dollars per annum, to be paid quarterly, from the date hereof. And the said John Riick covenants and engages to execute any work, in the line of his profession, which may be required of him, either by the Director, or by the Chief engraver, whether for the immediate use of the mint, or for that of the U. States, when ordered by a resolution or act of Congress, or by the President, for that purpose. Provided, that, in the execution of any such work, no extraordinary hours of labour or attendance be required, without an adequate compensation therefor.

Sir,

Treasury Department

12 February 1807.

Your letter of the 7 instant is received.
The difference of sixty cents to which you allude arose
from a mere clerical error in communicating to
you the settlement of your account. The balance of
your account for ordinary receipts and expenditures
for the third quarter of the year 1806 is $8,675 \frac{23}{100}$ dollars
and not $8,675 \frac{83}{100}$ as stated in my letter to you of the
31 January.

In regard to the bill of exchange of David
Stewart and Sons, I have several times written to
Mr. Hollingsworth, the late district attorney of Ma-
ryland, to pay over the money which he has recovered
and received on that account, but my requests are
not yet complied with. I shall continue to urge
the payment of it by such means as may appear
best calculated to effect the object.

I have no doubt
but that it is unpleasant to you, that the amount

of this bill should have remained so long to your
debit; and I cannot but regret that any circum-
stance should have rendered this course necessa-
ry - I hope, however, that it will not be long
before this item of difference may be, consistently,
stricken out of your Account, and your mind
relieved from the unpleasant sensation occasion-
ed by its continuance. At any rate you cannot
be affected, in a pecuniary way, by any result
which may ultimately happen in the case.

The same carefully examined the specimens of the water found by Mr. John White, which were delivered to us at the Arsenal in Philadelphia for the purpose of ascertaining its purity.

Having previously ascertained that it contained little or no indication of any kind except common salt, with a small earthy or insoluble sediment, 1000 grains of a mixture of 8 specimens of iron and sulphuric acid, and [the earthy sediment being first collected] a sufficient quantity of the mixture of solvent was dropped into the solution, which from the known laws of chemical affinity, produced a decomposition, and a quantity of solvent was thrown down. This was carefully collected, ^{and being well} repeatedly washed & dried, and weighed, ^{2.18} found to be $18\frac{1}{2}$ grs. Thus, according to known experiments, 100 grs. of the mixture of solvent contain 16.5 grs. of oxalic acid, and in common salt the mixture used was found to be in the proportion of 12 grs. of common salt to 1 gr. of water. Hence the 18 grs. of the mixture of solvent would contain 216 grs. of a gr. of the acid thus would require 2520 parts of a gr. of soda to form common salt. The proportion, therefore, of common salt, on the above hypothesis, is 5295 parts of a gr. in 1000 grs. of the water. In reality another weight measure than this is used. The whole impurities, there being, as before, he partly stated as not exceeding $\frac{63}{100}$ of a gr. in the 1000. —

... of the water is, which, however, differs from some other as much as two parts of a grain.

With respect to the water which the water contained, we would observe, that when taken out of the cask in the middle of the summer it appeared as they do when kept in a dry copper vessel of the same. In order to determine its nature of crystallization, with any other substance which it might take when in pure

1000 grs. of this matter was in the same jars, and having melted
it slowly over a charcoal fire, found that when cold it appeared
to have lost in weight only $\frac{2}{10}$ parts of a grain.

A second trial gave, within a very small fraction of a grain,
the same result.

We have carefully examined the specimens of nitre, referred by Mr John White, which were delivered to us at the Arsenal in Philadelphia, for the purpose of ascertaining its purity.

Having previously satisfied ourselves that it contained little or no impurities of any kind except common salt, with a small earthy or insoluble sediment, two grains of a mixture of 12 specimens taken indiscriminately from different casks, were dissolved in pure water, and a sufficient quantity of the nitret of silver was dropped into the solution, which, from the known laws of chemical affinity, produced a decomposition, and a muriet of silver was thrown down. This was carefully collected, and being dried in a water bath, we found it weighed 2.78 grs. and being dissolved in water, it weighed 2.78 grs. Now, ac-

cording to Rivierant's experiments 100 grs of the muriet of silver contains 16.54 grs of murietic^{acid} and in common salt the murietic acid & soda are stated to be in the proportion of 52 of the former to 101 of the latter. Hence the 2.78 grs of the muriet of silver would contain .4548 parts of a grain of the acid and thus would require .3586 parts of a grain of soda to form common salt. The proportion therefore of common salt, on the above hypothesis, is .8134 parts of a grain of common salt in 1000 grs of the nitre, which with the .15 parts of a grain of sediment gives .9634 parts of a grain for the whole impurities in the 1000 grs of nitre.

It is true, that Lavoisier, and some other late authors state the proportion of acid in the muriet of silver as 25 to 100, and on this supposition the whole impurities would amount to $1\frac{38}{100}$ gr in the 1000

The above is the mean result of two trials each with 1000 grs of water which, however, did not differ from each other more than $\frac{1}{100}$ part of a grain.

On melting 1000 grs of this water in a Florence flask over a charcoal fire, it was found, when cooled down to the temperature of the atmosphere, to have lost in weight exactly one grain.

Sir,

I have the honor to acknowledge the receipt of your favor of the 7th instant. As there are at present, no funds at the disposal of this Department in England, the only mode in which the remittance you propose to make to Mr. Docton, can be effected will be by purchasing a bill or bills of Exchange for the amount. I recommend that you employ the Cashier of the Bank of the United States for making this purchase, informing him that it is done at my request; and that he will be allowed the same commission (one quarter per Cent) that he is allowed on the purchase of bills for this Department. The bills ought to be endorsed, and bought with the same precautions as to the validity of the drawee as is practised for bills bought for the use of the Treasury. On shewing this letter to Mr. Simpson, which he may consider as his authority for the purpose, he will advance the cost of the bill or bills of Exchange; and on rendering to the Treasurer of the Mint his account for the cost of the bills, including his commission, the precise

sum will be immediately remitted to the Treasurer of the Mint to be paid
over to Mr. Simpson and thus the transaction as far as relates to him
be settled.

I recommend this course because it ensures greater safety in
the purchase of the bills; and will just mention that a British
Packet will sail in a few days from New York, by which it will be

possible to forward the bills to Mr. Boulton.

May 31st 1809.

Sir,

Conformably to the provisions of the Act of Apr. 10th 1800 "regulating the currency of foreign coins in the United States" I have to request that you will cause assays to be made at the Mint of the coins made current in this country by that act; viz: gold coins of Great Britain Portugal France & Spain, Spanish dollars and parts thereof, and Crowns of France and parts thereof. The latest coins of these descriptions that can be procured are to be assayed; but the assay is to extend also to coins of earlier dates which are usually circulating in the country. As the object of the law is to guard against the introduction of debased coins of whatever date they may purport to be, that object will be best answered by subjecting to the assay, coins of the latest importations, whether the dates they bear be late or not. Coins of this description may be obtained at the Banks, provided the monies kept by them are deposited in such way as to enable them to ascertain the periods of their arrival. If not, there appears to be no other mode but the selection of pieces bearing the latest dates, and subjecting them to assay, distinctly from those of earlier dates.

You will please to make a report of the result in the same manner as was done in the year 1807; and will transmit an account of the expense incurred in the operation.

Si,

Department of State
April 10th 1809

Being desirous of having a Consular Com-
mission engraved for this office, and understanding that
there is employed in the Mint an assistant engraver who
could do this without any additional charge to the
public, will you be good enough to inform me whether
this is the fact, and if so, how soon a commission
consisting of about 300 words could be engraved, with
some appropriate device at the top? The form
and the particular manner in which it is desirable
it should be executed, could be hereafter communica-
ted to you, if your answer should be affirmative.

I have the honor to be
with great respect,
Sir,
your most ob^lt.

Sir,

Treasury Department
November 24th 1810.

I have received your letter of the 20th instant, on the subject of the deficiency in the appropriation for the contingent expenses of the Mint, and the embarrassments thereby occasioned to its operations.

I have no authority to direct the Treasurer of the Mint to advance any part of the money in his hands for this object; and as there is no appropriation existing, if he does it, it must be at his own risk. Except the objection which that officer may make to the measure, I do not perceive any other.

I am, respectfully,
Sir,

Your Obedt Servt,

Albert Gallatin

Robert Patterson Esq
Director of the Mint

Treasury Department
Sep. 24. 1860.

Sir,

I have received your letter of the 21st instant, requesting an explanation respecting the appropriation for the contingent expenses & repairs of the Mint.

The deficiency in that appropriation this year has arisen from two causes: 1. the monies drawn from the Treasury for these objects, including the pay of labourers (which has been uniformly in our accounts united with the contingent expenses) have for the last three years annually exceeded the sums appropriated. 2. There has also been charged against this appropriation the sums paid annually from the Treasury for wastage on the gold & silver coined; and which is understood to go exclusively to the Chief Coiner & to the Melters & Refiner.

A statement of the sums appropriated and paid since 1860 is annexed; by which it will be seen that the sums paid in 1807-8 & 9 for Contingent Expenses & Repairs was \$30,000, while the amount appropriated, including wages of labourers, for those three years was only \$32,528; and there was moreover paid during those three years for wastage, & charged to this appropriation \$5,905.68. We were enabled to pay these sums so much larger than the appropriations, only out of the balances remaining undrawn from former years, which had not been carried to the surplus fund; the conditions necessary for this operation, agreeably to the Treasury construction, not having taken place in those years, as they did in 1806, when \$6,175.78 was carried from this appropriation to the surplus fund. During
the

the course of the present year, the wastage for both 1808 & 1809 has been paid, amounting to \$6,105.30, and left of the appropriation made for the present year including the balance from last year, only \$6,053.06, which has been paid to the Treasurer of the Mint.

It may perhaps be questioned whether the sums paid for wastage ought to be charged to this appropriation. It is however certain that they cannot be paid at all, at the Treasury, unless they are paid out of this appropriation, there being no other for

the subject I believe, was pretty fully discussed some years ago between your predecessor Mr. Boudinot and the Comptroller of the Treasury; and the result was an agreement on the part of the Treasury to pay this allowance. No separate appropriation was ever made for it, and it necessarily became a charge on that which was annually made for "repairs of furnaces, rollers, screws &c." and all other contingencies of the mint. For several years while the coinage was limited, the expenses did not equal the appropriation; latterly, the coinage being more considerable, they have exceeded it, and your estimate for the ensuing year must be enlarged accordingly.

If you have occasion to write again on this subject, be pleased to address your letter under cover to the Secretary of the Treasury.

I am respectfully Sir,
your obed. servt.

Dear Sir!

I am requested by a very distinguished character of Santa Fe, in South America, to procure for him, a machine, similar to one used in the Mint of the United States, for coining Dollars, half Dollars & quarter Dollars. I therefore beg leave to ask, if there can be any objection, to such an one being made, under the responsibility of my house, that it shall be shipped under our inspection, on board one of our own vessels, & in the care of a very confidential person bound to the City of Carthagena. no power nor inclination to
interfere in the business.

Sir

I have submitted your two letters of
17th & 22nd inst to the President. He has
no direct authority to permit a shipment from
England, though it might be inferred that
property belonging to the public could not
be liable to forfeiture. The Secretary of
the Treasury may remit forfeitures only,
after they have been incurred. Upon the
whole it is thought advisable to suspend your
order for shipment for some time, but in
the mean while the money which appears to
be fairly due ought to be paid; and I have
accordingly directed a sufficient remittance
to be made to the Treasurer of the
Mint.

Sir,

A good deal of trouble having been experienced upon a former occasion, in consequence of the purchase of a bill of exchange by the Treasurer of the Mint, which was protested, and it being somewhat doubtful whether the right of priority of the U. States in case of the insolvency of the drawer or endorser of such bill, could be maintained, ~~and the bill was paid to the drawer for the amount of the bill~~ of the U. States, I have thought it would be best that the sum now wanted for the Mint should be thus purchased. I will thank you therefore to inform me of the precise sum in sterling money for which the bill is wanted. After it is purchased, it will be sent to the Treasurer of the Mint that it may be remitted by him to Mr. Boulton who is to receive ~~the~~ ^{the} proceeds in England.

Sir,

Treasury Department,
Comptroller's Office,
3. July 1811.

The cause of the difference between your statement and that made at the Treasury in your account of Copper coins is this: - You are credited at the Treasury with the actual amount of Copper coins passed to the credit of the Treasurer of the U. States at the several banks and actually covered by Warrants; and not the sum which you pay over for the purpose of being transmitted to the banks. You charge the latter sum, the whole of which may not be (and indeed generally is not) covered by Warrants at the time of adjusting your account.

Director of the Mint

Mont of U. S. Jan'y 9th 1872

The Director has learned, not only from information, but in many instances from his own observation, that some of the workmen belonging to the Mint have contracted certain irregularities & evil habits, which he is determined shall no longer be persisted in with impunity. He therefore orders,

1. That his former regulations respecting the late attendance or absence of workmen shall henceforth be carried into rigid execution; nor will the Director, except in imperative cases, ever remit any fines or forfeitures thus incurred.

2. That no person, no workman, without special permission from ^{their} ~~some~~ ^{or the Director} ~~officer of the Mint~~, shall leave the building during working hours nor bring into the same any brandy or other spirituous liquors, on pain of being fined, or dismissed from his employment, as the Director shall think proper.

3. When a refreshment or drink shall be judged necessary, Mr. Schuyler, or his deputy, will furnish the same within the building, & make a proper charge thereof, to the person to whom it is furnished.

Washington, Decem. 1812.

SIR,

ENCLOSED you will find my draft No. 5542 on *Benjamin Rush Esq. Cash* for, Dollars, *2,769⁵⁸/₁₀₀* the amount of warrant No. 5558 issued by the Secretary of the Treasury on receipt whereof be pleased to furnish me with an early acknowledgment, specifying the sum received.

With due consideration, I am, Sir,
Your obedient servant,

Thos. S. Tucker
Treasurer of the United States.

Benjamin Rush Esq.

Remarks on the Treasurer of the Mint's account.

Balance of Copper plauchets in the hands of the Chief Coiner Dr. 12. 00¹ Doll. 86¹
on the 30th March 1811 per the Treasurer's account rendered. 1423. 6. 18 = 488. 08 ⁵/₁₀

Credit to the Chief Coiner by Copper coins delivered to the Treasurer
July 9. 1811 per his acc^t of Sept. 30. 1811 920. 9. 10 = 315. 70

Add this sum, per warrant passed to the Treasurer's credit in Mar.
of 1811 more than he received from the Chief Coiner, or delivered to
Juch Cox, Agent &c arising from an error in counting Cents & Half
cents remitted to the U. S. Branch bank at Boston 11. 0. 06 = 3. 78

Deduct this sum charged by the Treasurer more than he
received from the Chief coinier or delivered to Juch Cox,
Agent &c arising from an error in counting Cents & half cents
remitted to the Bank of Columbia 931. 9. 16 = 319. 48

Amount received from the Chief Coiner 2. 9. 5 = .. 95

Add amount of spoiled Copper plauchets received from
the Chief Coiner per acc^t for the ending Sept. 30. 1811 and
placed to the debit of Profit & Loss acc^t instead of to the
Debit of the Treasurer's account, in the first instance,
until their ultimate disposition shall be shown 362. 8. 18 = 124. 37

Also this sum allowed as a credit to the Chief coinier
in order to balance his account, supposed to be the
difference in the Copper Plauchets weighing more than
7 Grs to a cent 131. 9. 9 = 45. 18 ⁵/₁₀

as above 1423. 6. 18 = 488. 08 ⁵/₁₀

Note. The above corrections balance the accounts of the Treasurer of the Mint
on the Treasury settlement, and make no other difference in
the accounts of the Mint, than that instead of the balance of
Profit & Loss account, being Doll. 39978. 56 ⁵/₁₀ it is, or ought to be,
Doll. 39921. 39 ⁵/₁₀ - of which it appears necessary that the Treasurer
should be informed. -

Notwithstanding all the care we
have taken to make the boats you have the
goodness to let the Steam Boat ferry to New York
bever they are gone and we should be much obli-
ged to you if you could let us have another cash
M^r Luther Baldwin has a team going to Philadel-
phia and has promised to take charge of them and
will pay the amount - the numbers in the cash may
suit your own convenience - but we should be glad
to have 4 or 500 \$.

Sir,

Treasury Department
December 11th 1813.

I beg leave to request that the annual assays
of foreign coins as directed by the act of April 10, 1806
may be made, and the result communicated to me to be
laid before Congress.

I am Respectfully

acting Secretary of the Treasury

Robert Patterson Esq.
Director of the Mint
Philadelphia.

I am informed by the Treasurer of the
United States, that "it is judged advisable, at pre-
sent, to abstain from the further distribution
of copper coins". I shall of course suspend the
issuing more, & the issue of orders for them
on the mint. The Treasurer requests that I
should settle the account for the period which
has elapsed since the end of the September quar-
ter 1812, to which time I had previously closed
my accounts. I will thank you therefore for
such a return, with remittance, now, as would
take place, if this were the end of a quarter, in
the Treasury desired, without waiting for that
time. The return probably will soon be ac-
ceptable to him, as well as to, Sir,

Yrs. respectfully, R. L. Loomis
